SUMMARY

Full Stack Developer with hands-on experience building and shipping production web and mobile products end to end. Skilled in React, Next.js, React Native, Node.js, NestJS and PostgreSQL, with a focus on responsive interfaces, secure APIs, real-time features and payment flows.

EXPERIENCE

Software Developer AIO Infinity
InfiQ V2 – Multi-Tenant WhatsApp Business Messaging Platform *January 2026 – Present, Bhopal, MP*

Live chat, contact management, agent inbox, broadcast campaigns, no-code chatbot flows, and a developer platform (API & webhooks) with usage-based billing. Next.js dashboard and NestJS backend.

- Owned features end to end: Prisma schema design, NestJS API layer (guards, use-cases) and the matching Next.js UI (RTK Query domain), enforcing a 4-layer state ownership model (RTK Query, Redux, Jotai, local state) and DDD boundaries across frontend and backend.
- Implemented authentication (OTP signup, JWT refresh rotation, role-based guards) enforced on both server middleware and client route guards across tenant and admin roles, with AES-256-GCM encryption of stored WhatsApp credentials.
- Built the campaign pipeline: CSV upload, BullMQ fair-queued dispatch (one lane per WhatsApp number, tenant holds so one bulk send cannot starve others), Meta WhatsApp API delivery, and real-time status over Socket.IO on a live analytics dashboard.
- Developed a PostgreSQL wallet and ledger engine with per-tenant locks and idempotency keys, preventing double charges on retried or replayed requests.
- Integrated Razorpay with signature-verified, replayable webhooks and reconciliation jobs, keeping payments consistent through duplicate and out-of-order events.

FREELANCING

Full Stack App Developer
CommuneChat – WhatsApp-Style Community App *Oct 2025 – Dec 2025*

- Built and deployed a cross-platform mobile client (React Native, Expo, NativeWind) with status updates, profiles, private/public groups, and username-based sign-up instead of phone numbers for member privacy.
- Architected real-time messaging on Supabase Realtime (read-receipt sync, 24-hour ephemeral Status), with a Zustand and TanStack Query data layer and PostgreSQL RLS policies and PL/pgSQL triggers for Status expiration.

SKILLS

Languages	JavaScript, TypeScript, C++, HTML5, CSS3
Frontend	Next.js, React, React Native, Redux Toolkit, Zustand, TanStack Query, Tailwind CSS
Backend	Node.js, NestJS, Fastify, Express.js, Socket.IO, BullMQ, REST/WebSocket APIs
Databases	PostgreSQL, Prisma, Supabase (RLS, PL/pgSQL), MongoDB, Redis, SQLite
Cloud & Tooling	AWS (S3, SES), Sentry, EAS Build, ESLint/Prettier, Git
Practices	Domain-Driven Design, Billing/Ledger systems, System design, Code review

EDUCATION

Bachelor of Technology in Computer Science and Engineering, Sagar Institute of Science and Technology (SISTec), Bhopal 2022 - 2026
Relevant Coursework: Data Structures, Algorithms, Computer Networks, DBMS, OOP, Software Engineering
